PROFESSIONAL SUMMARY

Full-stack developer with 2+ years building production-grade web applications and AI-powered systems. Completed a backend internship at Smile Check AI writing high-performance Rust services and optimizing PostgreSQL databases for a dental health application, and a summer internship with the Channel and Development Solutions team at EasyPaisa, working on merchant and retail application features. Proficient in the MEAN stack, Python, and RESTful API design. Delivered key projects including a real estate marketplace, a fraud detection system, and a large-scale digital media archive.

EDUCATION

Bachelor of Software Engineering <i>National University of Modern Languages (NUML)</i>	June 2026 <i>Rawalpindi, Pakistan</i>
--	--

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, PHP, Rust, C/C++
Frameworks & Libraries: React, Angular, Node.js, Express, Flask, Django
Databases: MongoDB, MySQL, PostgreSQL, Supabase, Redis
DevOps & Version Control: Docker, Git, GitHub, GitLab
AI Tools: ChatGPT, Claude, GitHub Copilot, Cursor
Developer Tools: VS Code, Postman, Figma
Productivity & Collaboration: Slack, Lark, Trello, Notion, Jira

PROFESSIONAL EXPERIENCE

Summer Intern <i>EasyPaisa</i>	July 2026 – August 2026 <i>Onsite</i>
- Supported the Channel and Development Solutions team during a summer internship at EasyPaisa, a digital bank - Programmed and maintained features for merchant and retail applications - Evaluated EasyPaisa APIs and fintech concepts during technical sessions	
Backend Developer Intern <i>Smile Check AI</i>	June 2025 – August 2025 <i>Remote</i>
- Developed backend services in Rust to process AI diagnostic requests for dental health application - Optimized PostgreSQL queries and implemented Redis caching to improve API response times - Participated in code reviews and collaborated with development team using Agile methodology	

KEY PROJECTS

Homixa.us – Real Estate Platform <i>MEAN Stack, RESTful APIs</i>	2024
- Built real estate marketplace platform featuring property listings, search functionality, and user accounts - Developed RESTful APIs to handle property data, user authentication, and search queries	
Fraud Detection System <i>Python, React, Flask, Machine Learning</i>	2024

- Created machine learning model to analyze transaction patterns and identify fraudulent activity
- Built real-time dashboard using React to display alerts and transaction monitoring data

Digital Media Archive (FYP) | *React, Node.js, MongoDB, REST APIs*

2026

- Designed and developed a centralized digital media archive for storing, browsing, and sharing multimedia content from global organizations
- Implemented scalable RESTful APIs and MongoDB database to manage large datasets efficiently
- Built advanced search, filtering, analytics, and contributor management features to enhance content discoverability
- Optimized media upload, streaming, and metadata processing for high performance and reliability
