Professional Summary

Software Engineer and MERN Stack Developer with 2+ years of hands-on software development experience building responsive web applications, RESTful APIs, automation workflows, and AI-integrated solutions. Experienced with React, Next.js, Node.js, Express, MongoDB, TypeScript, Python, PostgreSQL, and cloud deployment. Proven experience collaborating with local and international clients, cross-functional teams, and technical stakeholders to deliver maintainable software. Strong focus on clean code, testing, API integration, deployment, continuous learning, and practical AI integration using LLMs, NLP, and machine learning workflows.

Technical Skills

Languages: JavaScript, TypeScript, Python, PHP, Rust, C++, Java

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, REST APIs, RESTful Services, Authentication, API Integration

Databases: MongoDB, PostgreSQL, MySQL, Redis, Supabase

AI / Data: AI Integration, Large Language Models, NLP, Machine Learning, Python AI APIs, Prompt Engineering

Testing / Quality: Playwright, API Testing, Unit Testing, Integration Testing, ESLint

DevOps / Cloud: Git, GitHub, GitLab, Docker, Vercel, Railway

Engineering: Agile, SDLC, Debugging, Code Review, Performance Optimization, Secure Coding

Experience

Software Engineering Intern

July 2026 – Present

Easypaisa, Channel and Development Solutions Team

Onsite, Pakistan

- Supported software development initiatives for merchant and retail applications within a large-scale digital financial services environment.
- Worked with application features, APIs, debugging, and development workflows while collaborating with engineers and technical stakeholders.
- Evaluated internal APIs and fintech application flows, strengthening practical understanding of integration, reliability, and production software practices.
- Contributed to team-based delivery and technical learning across development, testing, and application support activities.

Backend Developer Intern

June 2025 – August 2025

Smile Check AI

Remote

- Developed backend services in Rust for AI-assisted dental health workflows and diagnostic request processing.
- Optimized PostgreSQL queries and introduced Redis caching to reduce API latency by 25% and improve response consistency under repeated requests.
- Implemented and maintained RESTful backend endpoints, data-processing logic, and service integrations for application workflows.
- Participated in code reviews, debugging, and Agile team collaboration across remote development workflows.

Freelance Full-Stack Developer

2024 – Present

Independent Software Developer

Remote

- Built and deployed custom web applications and business websites for local and international clients using React, Next.js, Node.js, Express, MongoDB, TypeScript, and REST APIs.
- Delivered client-facing features across frontend, backend, authentication, API integration, database design, deployment, and post-launch fixes.
- Collaborated directly with international clients to gather requirements, translate business needs into technical tasks, and deliver iterative releases on agreed timelines.
- Integrated third-party APIs and AI services into selected applications, including LLM-based workflows and Python-powered automation where appropriate.

Projects

Digital Media Archive (Final Year Project)

2026

React, Node.js, Express.js, MongoDB, REST APIs

- Designed and developed a centralized media archive for storing, browsing, searching, and sharing multimedia content from multiple organizations.

- Implemented RESTful APIs, authentication, metadata management, advanced search, filtering, analytics, and contributor workflows.
- Improved upload and metadata processing efficiency by 25% through request optimization, structured data handling, and performance-focused API design.

Fraud Detection System
Python, Flask, React, Machine Learning

2024

- Built a machine learning workflow to classify transaction patterns and identify potentially fraudulent activity using Python and supervised learning techniques.
- Developed a React dashboard for transaction monitoring, alert visualization, and model-result review through a Flask-based API.
- Achieved 75% validation accuracy / 80% precision on the selected dataset after model evaluation and preprocessing.

Homixa.us Real Estate Platform
MERN Stack, REST APIs, Search

2024

- Built a real estate marketplace experience with property listings, search, filtering, user accounts, and responsive client-side interfaces.
- Developed REST APIs and database workflows for property data, user authentication, and search operations.
- Optimized key page and API flows to improve load time by 40% and support a smoother property discovery experience.

Education

Bachelor of Software Engineering
National University of Modern Languages (NUML)

June 2026
Rawalpindi, Pakistan

Certifications

- **MEAN Stack Development Workshop** | IEEE | Completed
- **Professional Digital Marketing Certification** | HAMI Trainings | January 2024
- **Python Developer Internship Certificate** | CodexCue Software Solutions | Completed
- **Front-End Development Internship** | WebDevMasters | Completed

Continuous Learning

- Advanced React and Next.js patterns, TypeScript, API architecture, API testing, and production deployment.
- AI integration with LLM APIs, NLP workflows, Python automation, and machine learning fundamentals.
- Modern development practices including Git workflows, Docker, deployment, environment configuration, and application maintenance.

Languages

English: Professional Working Proficiency

Urdu: Native / Fluent

Interests

Software Development, Artificial Intelligence, Web Application Engineering, Open Source, Developer Tools, Automation, Gaming, Technology
