PROFESSIONAL SUMMARY

Full-stack developer with 2+ years building production-grade web applications and AI-powered systems. Completed a backend internship at Smile Check AI writing high-performance Rust services and optimizing PostgreSQL databases for a dental health application. Runs Devmerce, a freelance development business serving international clients in e-commerce, healthcare, and financial services. Proficient in the MEAN stack, Python, and RESTful API design. Delivered key projects including a real estate marketplace, a fraud detection system, and a large-scale digital media archive.

EDUCATION

Bachelor of Software Engineering <i>National University of Modern Languages (NUML)</i>	Expected: June 2026 <i>Rawalpindi, Pakistan</i>
--	--

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, PHP, Rust, C/C++
Frameworks & Libraries: React, Angular, Node.js, Express, Flask, Django
Databases: MongoDB, MySQL, PostgreSQL, Supabase, Redis
DevOps & Version Control: Docker, Git, GitHub, GitLab
AI Tools: ChatGPT, Claude, GitHub Copilot, Cursor
Developer Tools: VS Code, Postman, Figma
Productivity & Collaboration: Slack, Lark, Trello, Notion, Jira

PROFESSIONAL EXPERIENCE

Backend Developer Intern <i>Smile Check AI</i>	June 2025 – August 2025 <i>Remote</i>
--	--

- Developed backend services in Rust to process AI diagnostic requests for dental health application
- Optimized PostgreSQL queries and implemented Redis caching to improve API response times
- Participated in code reviews and collaborated with development team using Agile methodology

Freelance Full-Stack Developer <i>Devmerce</i>	January 2025 – January 2026 <i>Remote</i>
--	--

- Build and deploy web applications for clients in e-commerce, healthcare, and financial services sectors
- Generate leads through digital marketing campaigns including SEO, content marketing, and social media
- Coordinate with freelance teams to deliver projects on schedule and within client budgets

KEY PROJECTS

Homixa.us – Real Estate Platform <i>MEAN Stack, RESTful APIs</i>	2024
---	------

- Built real estate marketplace platform featuring property listings, search functionality, and user accounts
- Developed RESTful APIs to handle property data, user authentication, and search queries

Fraud Detection System <i>Python, React, Flask, Machine Learning</i>	2024
---	------

- Created machine learning model to analyze transaction patterns and identify fraudulent activity
- Built real-time dashboard using React to display alerts and transaction monitoring data

Digital Media Archive (FYP) | *React, Node.js, MongoDB, REST APIs*

2026

- Designed and developed a centralized digital media archive for storing, browsing, and sharing multimedia content from global organizations
- Implemented scalable RESTful APIs and MongoDB database to manage large datasets efficiently
- Built advanced search, filtering, analytics, and contributor management features to enhance content discoverability
- Optimized media upload, streaming, and metadata processing for high performance and reliability
