Professional Summary

Software Engineer and MERN Stack Developer with 2+ years of hands-on experience building full-stack web applications, REST APIs and client-facing software. Experienced with React, Next.js, TypeScript, Node.js, Express and MongoDB, with additional experience in PostgreSQL, Redis, API integrations and Docker. Currently a Software Engineering Intern at Easypaisa, with backend experience at Smile Check AI and front-end experience on the Browse browser extension.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication, API Integration

Databases: MongoDB, PostgreSQL, MySQL, Redis

Tools & Deployment: Git, GitHub, Docker, Vercel, Railway

Additional: Python, Flask, AI API Integration, Playwright

Experience

Software Engineering Intern

Easypaisa

July 2026 – Present

Rawalpindi, Pakistan

- Developed and debugged application features supporting merchant and retail workflows.
- Worked with internal APIs, application flows and development processes alongside engineering teams.
- Investigated application issues and supported debugging, testing and application delivery.
- Collaborated with engineers and technical stakeholders within a large-scale fintech environment.

Backend Developer Intern

Smile Check AI

June 2025 – August 2025

Remote

- Developed RESTful backend services in Rust for AI-assisted dental health workflows.
- Optimized PostgreSQL queries and introduced Redis caching, reducing API latency by 25%.
- Implemented backend endpoints, data-processing logic and service integrations.
- Participated in debugging, code reviews and Agile development.

Junior Software Engineer

Browse

June 2025 – Present

Remote

- Developing and maintaining the Browse browser extension using HTML, CSS and JavaScript.
- Implemented extension UI, popup flows and options pages with responsive design.
- Collaborated with the team to integrate the extension with backend APIs and third-party services.
- Contributed to improving user experience through iterative feature development and bug fixes.

Projects

Digital Media Archive | MERN Stack

React, Node.js, Express.js, MongoDB, REST APIs

2026

- Built a centralized platform for storing, searching and sharing multimedia content.
- Developed REST APIs, authentication, metadata management, search, filtering and analytics.
- Optimized request handling and metadata processing, improving efficiency by 25%.

Homixa.us Real Estate Platform

MERN Stack, REST APIs, Search

2024

- Built a real estate platform with property listings, search, filtering and user accounts.
- Developed REST APIs and database workflows for property management and authentication.
- Optimized key application flows, improving load performance by 40%.

Fraud Detection System

Python, Flask, React, Machine Learning

2024

- Built a transaction monitoring system using Python, Flask, React and machine learning.
- Developed a dashboard for transaction monitoring, alerts and model-result review.
- Achieved 75% validation accuracy and 80% precision on the selected dataset.

Education

Bachelor of Software Engineering
National University of Modern Languages (NUML)

June 2026
Rawalpindi, Pakistan

Certifications

- **MEAN Stack Development Workshop** | IEEE | Completed
- **Professional Digital Marketing Certification** | HAMI Trainings | January 2024
- **Python Developer Internship Certificate** | CodexCue Software Solutions | Completed
- **Front-End Development Internship** | WebDevMasters | Completed
